NOTE: sorry if hindi tama pag kakagawa . Medyo na lost of touch aq, nag suggest narin ako couple of names kahit napalitan na sya recently lng

Apps to TimePERS

Alternatives with similar features, scope, and objectives: search, directions, traffic, places, and reviews.

Closest All-Around Alternatives

Google Maps (Android, iPhone, web)

- **Overview:** Google's all-in-one mapping service and the baseline the apps below are compared against.
- **Key features:** Turn-by-turn navigation for driving, walking, cycling, and transit, live traffic and rerouting, Street View, Live View (AR walking directions), offline maps, place search with reviews, photos, and opening hours, saved lists, location sharing, and Android Auto / CarPlay support.

Apple Maps (iPhone, iPad, Mac; web beta)

- **Overview:** Apple's full mapping service, now close to Google Maps in capability.
- **Key features:** Turn-by-turn navigation, live traffic, transit directions, Look Around (street-level 3D views), offline maps, place ratings and photos, and CarPlay support.

Waze

- **Overview:** A navigation app focused on live, crowd-sourced traffic.
- **Key features:** Real-time hazard, police, and accident reports, automatic rerouting, speed limit alerts, and fuel prices. Weaker on place discovery and reviews.

Microsoft Bing Maps

- **Overview:** Microsoft's web-based maps service.
- **Key features:** Driving, walking, and transit directions, traffic, satellite and bird's-eye imagery, and business search.

HERE WeGo

- **Overview:** A full navigation app that works well without internet.
- **Key features:** Downloadable country maps, turn-by-turn navigation, public transit, car-sharing and taxi options, and live traffic when online.

TomTom (AmiGO / GO Navigation)

- **Overview:** A long-standing navigation brand with strong traffic data.
- **Key features:** Live traffic, lane guidance, speed camera alerts, and offline maps.

Sygic GPS Navigation

- **Overview:** A premium offline navigation app.
- **Key features:** 3D offline maps, lane assist, speed camera warnings, and HUD mode.

Open-Source and Offline-Focused Options

OsmAnd

- **Overview:** Open-source navigation built on OpenStreetMap data.
- **Key features:** Offline maps, routing for driving, walking, and cycling, contour lines, and highly customizable map styles.
